

FLIGHT SAFETY FOUNDATION

Presents the

FSF Business Aviation

Meritorious Service Award

to

Terry Yeomans

International Business Aviation Council (IBAC)

For his years representing business aviation on the International Civil Aviation Organisation's Ground Handling Task Force, for his work developing practical safety management systems guidance for ground handling operations, and for furthering development and acceptance of the International Standard for Business Aircraft Operations and the International Standard for Business Aviation Handlers.

Terry has been a Key member of the ICAO Ground Handling Task Force (GHTF) since its inception and was instrumental in helping develop a number of chapters and appendices of ICAO Doc 10121, Manual on Ground Handling, which was published in 2019.

During his tenure on the GHTF he has been a champion and advocate for the business aviation sector and has displayed an ability and willingness to work closely with other key stakeholders, such as airlines, airports and regulators.

Terry's knowledge and experience have proven invaluable in advancing the work of the GHTF and in discussions with the ICAO Safety Management Panel. He has been described by a colleague on the GHTF as a "true asset to aviation safety."

Flight Safety Foundation is honored and proud to recognise Terry Yeomans for his contributions to ground handling and business aviation safety.
